12) I agree with the office Note. It is also noticed that in S. No. 73, more land is now sought to be acquired than mentioned in the preliminary notification and the nature of the land required also seems to be different. For acquiring a part of the land a survey number, it is desirable to proceed under Sect 8 and mark out the part of the land and also prepare a plan of the area required.

13) I think therefore that the acquisition of both the numbers should be withdrawn and fresh preliminary notification published specifying the exact area required.

intentions of first- as regards the exact area to be acquired in each of the two and its boundaries - so that irregularities of the kind mentioned by the first witness in Hoy F may not arise. For the preliminary notn, a total extent of 5 acres was proposed to be acquired and it is now proposed to reduce it to one 33 cents. The records show that the owner of the land has protested against the acqn although the claim compensation at Rs 50/- per acre whereas for the dry portion the authorities have proposed to pay at Rs 20/- per acre. Having regard to the contentions raising in the case in a fractious village of the kind, it seem desirable to publish a fresh preliminary notification in this to avoid possible future complications. The records show that the case has been going on for the last 3 years and a delay of one or two months more to avoid irregularities is not likely to matter much.
